PROFILE

Results-driven and detail-oriented Flutter developer with a Bachelor's degree in Computer Science from KIIT. Strong passion for creating high-quality mobile applications. Proficient in leveraging Flutter framework to develop cross-platform solutions. Quick learner with a keen interest in exploring emerging technologies. Committed to delivering innovative solutions that meet client requirements . Seeking opportunities to contribute my expertise to dynamic development teams and make a positive impact in the field of mobile app development.

EXPERIENCE

LernX **2023-Present**
Flutter Developer

- Responsible for implementing UI designs provided by designers into mobile applications using Flutter framework.
- Ensure seamless integration of frontend UI with backend services, focusing on smooth transitions and high-quality user experiences.

PROJECTS

An AI Companion **2024**

- Developed a mobile application integrating AI capabilities through APIs.
- Implemented voice command functionality for seamless interaction with the app.
- Designed intuitive user interfaces to enhance user experience.

Medimate- Medicine Reminder Box **2023**

- Created a mobile app to interact with hardware devices for medication reminders.
- Utilized MongoDB for data storage and synchronization with the hardware.
- Implemented timely reminders and notifications for medication schedules.

Audio Music Player **2023**

- Designed and developed a music player application for Android devices.
- Included features such as local music playback, playlist management, and audio controls.
